

KAREEM SABRY ELSAYED

BACKEND SOFTWARE ENGINEER | PHP BACKEND ENGINEER

Mansoura, Egypt | +20 100 656 7821 | karem.metrial@hotmail.com
linkedin.com/in/karem-metrial | github.com/KaremMetrial | Open to relocation

PROFESSIONAL SUMMARY

Backend Software Engineer focused on PHP and Laravel, with hands-on experience building secure RESTful APIs, business-critical backend services, real-time features, payment integrations, and data-driven applications. Strong in MySQL database design and query optimization, Redis caching, background queues, automated testing, Docker-based development, CI/CD workflows, and production debugging. Comfortable working across existing codebases, improving performance and maintainability, and using AI-assisted engineering tools with independent technical validation.

TECHNICAL SKILLS

Backend: PHP, Laravel, NestJS, SQL, RESTful API Design, MVC, OOP, Design Patterns

Data & Performance: MySQL, Database Design, Query Optimization, Redis Caching, Performance Optimization

Async & Real-Time: Laravel Queues, Pusher, WebSockets, Firebase Cloud Messaging (FCM), Agora

Testing & Quality: PHPUnit, Pest, API Testing, Debugging, Security Review, Clean & Maintainable Code

DevOps & Tools: Docker, CI/CD, Git, GitHub, Composer, PhpStorm, VS Code

Admin & Front-End: FilamentPHP, Blade, HTML, CSS, JavaScript, Bootstrap

AI-Assisted Engineering: Codebase Analysis, Debugging, Test Generation, Architecture Review, Technical Research

PROFESSIONAL EXPERIENCE

Al Alamiya Elhura | Backend Developer

May 2026 - Present | Mansoura, Egypt

- Develop and maintain backend applications, RESTful APIs, and business services using PHP, Laravel, and NestJS.
- Implement authentication, database operations, and complex business logic while contributing to schema design, query optimization, and application performance.
- Use Redis caching and background queues where appropriate to support responsive and reliable backend workflows.
- Troubleshoot defects, review code and security concerns, and maintain automated tests with PHPUnit/Pest within Docker and CI/CD-based workflows.
- Use AI-assisted engineering tools for codebase analysis, debugging, testing, and architecture review, while independently validating solutions before delivery.

Waitbuzz | Back-End Developer

Apr 2025 - May 2026 | Mansoura, Egypt

- Designed and maintained secure RESTful APIs for web and mobile applications, with attention to performance and maintainability.
- Developed real-time Laravel Blade dashboards supporting hotel booking and reservation workflows.
- Built admin functionality for room and operational management, and implemented backend business rules for day-to-day platform processes.
- Optimized database operations and backend logic to improve reliability and application responsiveness.

Rmoztec | Back-End Developer

Jan 2025 - Mar 2025 | Mansoura, Egypt

- Developed PHP/Laravel web applications with MySQL-backed business logic and maintainable MVC architecture.
- Integrated the Moyasser payment gateway into an e-learning platform for secure online transactions.
- Built and customized FilamentPHP admin dashboards to streamline content and operational workflows.

Digital Egypt Pioneers Initiative (DEPI) | Web Development Intern

Apr 2024 - Nov 2024 | Mansoura, Egypt

- Enhanced PHP-based applications through feature development, debugging, and backend improvements.
- Optimized SQL queries and restructured database schemas to improve application response times.
- Collaborated in Agile sprint planning and delivery with cross-functional team members.

SELECTED PROJECTS

Maintenance & Field Service Platform | *Contracts, Billing, Technician Workflows*

- Developed backend workflows for a multi-role maintenance platform serving individuals, companies, technicians, and administrators, covering service requests, scheduling, technician assignment, and status tracking.
- Implemented contract and billing rules including contract-specific service pricing, recurring invoice schedules, signed-contract PDF uploads, and category-based cart validation.
- Built technician workflows with timestamped status transitions, completion attachments and reports, read-only wallet balances, and admin-managed settlement audit logs.

Barq & Dayem — Delivery Platforms | *PHP, Laravel, MySQL, Pusher, FCM*

<https://play.google.com/store/apps/details?id=com.wb.dayemClient>

<https://play.google.com/store/apps/details?id=com.barq.client>

- Built backend modules for users, orders, vendors, and delivery tracking in a multi-role delivery platform.
- Implemented RESTful endpoints for order creation, assignment, and status transitions, with real-time notifications and delivery updates.
- Designed backend structures with scalability, modularity, and clear API contracts in mind.

Sharwa - Auction & Marketplace Platform | *PHP, Laravel, MySQL, REST APIs, WebSockets*

<https://play.google.com/store/apps/details?id=com.wb.sharwa>

- Developed marketplace functionality combining classified listings with real-time auctions and instant bidding interactions.
- Implemented listing management, image/video uploads, advanced search and filtering, chat, comments, and real-time communication.
- Structured backend services to support auctions, listings, and high-interaction user workflows securely and efficiently.

E-commerce Platform | *Laravel, MySQL, Pusher, Bosta API*

<https://play.google.com/store/apps/details?id=com.wb.samoulla>

- Built backend functionality for products, inventory, orders, payment flows, and real-time order updates.
- Integrated Pusher for live order tracking and notifications, and Bosta APIs for shipment creation and delivery tracking.
- Developed admin workflows for managing catalog, inventory, and order operations.

Wathiq - Service Marketplace Platform | *PHP, Laravel, MySQL, REST APIs, Real-Time Systems*

<https://play.google.com/store/apps/details?id=com.wb.wathq>

- Built a multi-role marketplace connecting customers with service providers across maintenance and home-service categories.
- Implemented secure authentication, service requests, booking lifecycle workflows, real-time status updates, ratings, and reviews.
- Designed database and backend architecture to support future payments, notifications, and third-party integrations.

EDUCATION

Bachelor of Computer Science | **Mansoura University**

Faculty of Computer & Information | 2018 - 2022 | Mansoura, Egypt

CERTIFICATES

- PHP Web Development - Digital Egypt Pioneers Initiative (DEPI)
- Back-End Development (PHP, MySQL, Laravel) - Consulting of Computers and Information Center (CCIC)
- Web Design (HTML, CSS, Bootstrap, JavaScript) - National Telecommunication Institute (NTI)
